

### Emily's Story

Young mum Emily Morris, has lived with antibiotic-resistant bacteria for a decade.

"I carry a resistant strain of E. coli known as **ESBL E. coli**. I'm only 25, and if you look at how many antibiotics I've gone through, I'm already coming close to the end ones. By the time I'm 40, I still want to have antibiotics left. But if they don't find new solutions, it is inevitable that one day I will run out."

# A Great Big Thank you

## Every cuppa saves lives!

Every slice of cake (handmade or bought) brings us closer to finding new antibiotic therapies and saving modern medicine

Registered with FUNDRAISING REGULATOR

Antibiotic Research UK  
A registered charity in England and Wales (1157884)

## Antibiotic Research UK

is the world's first and only charity formed specifically to tackle antibiotic resistance. Our mission is to:

- Develop new antibiotic therapies by the early 2020's
- Educate the public and professionals about antibiotic resistance
- Provide patient information
